

HOLD HARMLESS AGREEMENT

Customer Name: _____

Service Address: _____

Privately owned underground facilities are not marked or protected by Indiana Call Before You Dig. It is the property owners' responsibility to locate and mark these facilities before South Central Indiana Rural Electric Membership Corporation (SCI REMC), or SCI REMC contractors, perform work on the property. SCI REMC will take reasonable steps to protect the member's property, but the nature of the work is such that we cannot guarantee against unforeseen damages that may occur to unmarked or mismarked underground facilities. Therefore, as a condition of service, the hold harmless agreement is required.

Please read, complete, and return this Hold Harmless Agreement. Refusal to return a signed agreement will delay the completion of this work and related services. If you have specific questions or concerns, please contact us at 800.264.7362.

By signing below, I waive, release, and agree to defend, indemnify, and hold harmless SCI REMC, its officers, directors, employees, contractors, and agents from all responsibility or liability for damage to any underground or aboveground facilities and other property arising out of or incident to the work performed in connection with installing fiber at the Service Address. The hold harmless agreement includes, but is not limited to, damage to the following: secondary electric, water, phone, gas, septic, wellhead, yard, garden, driveway, and fence.
